Greetings!

Thank you for downloading Gestures MoCap Collection. In this pack you will find 59 unique gestures animations now with proper looping. All animations are set to work with the Unity Humanoid rig system and have been tested on our very own MorroMan character. While retargeting please keep in mind that results may vary depending on the rig you are using. Animations are provided at 30 FPS.

If you are satisfied with this pack, we encourage you to browse the rest of our extensive library of motion captured animations. We offer a wide selection of animations from general movement and combat to more specialized dance or emote motions.

We also offer custom animation, both motion capture and hand/keyframe, along with 3D art services. Check out our website or contact us at the links below for more info.

With that we hope that you enjoy your current animations and be on the lookout for what's coming down the pipe next!

As always if you have any questions please feel free to contact us at:
